Subject: Real Science-4-Kids Biology, Level 1

Chapter 3 Notes

As usual, we're going to draw on a variety of resources to study photosynthesis in this chapter. These are the resources we're planning to use.

BrainPop

We're going to watch several videos this month to supplement our study of plants:

Photosynthesis

<http://www.brainpop.com/science/diversityoflife>

Plant Growth

<http://www.brainpop.com/science/cellularlifeandgenetics/plantgrowth>

Pollination

<http://www.brainpop.com/science/cellularlifeandgenetics/pollination>

Books

This month we'll read the last two books about cells and genetics: Amazing Schemes within Your Genes and Cell Wars both by Frances R. Balkwill. You can get both these books from the public library.

Websites

Biology for kids has a great page on photosynthesis.

Videos

We've begun watching the Planet Earth videos from NetFlix. I can't recommend these enough. The series consists of six disks – I request one at a time and watch it over a week or two, then we request the next. The videos are simply amazing.
